Hiking and culture on the Cote d'Azur

Joint program for a clientele of hikers and culture lovers

The Riviera is famous for its light, its landscapes which combines sea and mountains nearby, and a myriad of hills dominated by charming Provencal village.

On the coast, next to yachts and glitter, green routes enable visitors to experience lush landscapes, while the mid-country offers a multitude of cultural discoveries.

We offer two programs developed, one for customers wishing to go hiking through beautiful landscapes of the coast, the other for customers attracted by the discovery of the cultural richness of the region.

These two programs are executed in parallel to enable both kinds of customers, combined in one single group, to participate in a program which meets their own desire: hikers are accompanied by an expert guide who directs them and explain, in their language, main assets. Participants to culture program benefit from guided cultural orientation tours before leaving for further discovery of cultural sites and museums.

This approach facilitates logistics and reduces costs.

For you, organizer, it is the assurance of a double offer for easier implementation of your programs.
